

We are pleased to introduce
PSYCHIATRY
FOR CHILDREN & ADULTS
at Lepage Associates!

Dr. Jason Machalicky will start with us in December 2008. He completed his Residency Training in Adult Psychiatry and Fellowship Training in Child and Adolescent Psychiatry locally at the University of North Carolina at Chapel Hill, and has several years experience providing psychiatric services in NC.

We are excited to add psychiatry to our services for the convenience of our clients who may benefit from medication in their treatment. We are currently scheduling for December and forward; Chris can get you on Dr. Machalicky's calendar if you'd like an appointment.
